Summary

Entry-level Software Engineer and aspiring Java Full Stack Developer with knowledge of Core Java, OOP, SQL, JDBC, MySQL, HTML, CSS, and JavaScript. Hands-on experience building web applications and implementing database operations, CRUD functionality, and application workflows. Seeking an entry-level software development opportunity.

Education

Rajeev Gandhi Memorial College of Engineering and Technology (RGMCET) Nandyal, Andhra Pradesh, India
Bachelor of Technology in Data Science; CGPA: 7.27 / 10.0 *2022 – 2026*

Skills

Programming Languages: Java, SQL, Python
Core Java: Object-Oriented Programming (OOP), Exception Handling, Collections
Backend Development: Spring Boot, Microservices, REST APIs, JDBC
Databases: MySQL, SQL, Relational Database Design, Database Normalization
Web Development: HTML, CSS, JavaScript
Developer Tools: Git, GitHub, Eclipse IDE, VS Code, MySQL Workbench

Projects

E-Commerce Fashion Store | *Java, JDBC, MySQL, JSP, Servlets*

- Developed a Java-based e-commerce web application implementing product browsing, user accounts, shopping cart, and order management.
- Implemented backend business logic using Core Java, JSP, Servlets, and JDBC for user authentication and application workflows.
- Designed and managed MySQL tables for users, products, carts, and orders using SQL queries and relational database concepts.
- Implemented CRUD operations for product and order management with database connectivity through JDBC.
- Deployed the application on Apache Tomcat and integrated the frontend with Java backend components for end-to-end functionality.

MediCore – Medical Dashboard Platform | *REST APIs, JavaScript, HTML, CSS, SQLite*

- Developed a hospital appointment management system supporting patient, doctor, appointment, and review management.
- Integrated REST APIs for appointment booking, patient management, and healthcare data operations.
- Designed relational database tables and implemented SQL queries to manage patient, doctor, appointment, and review records.
- Implemented authentication and role-based access control for Admin and Patient modules.
- Applied CRUD operations, database normalization, and backend business logic to support healthcare application workflows.

Certifications

AWS Certified Cloud Practitioner – Amazon Web Services (2025). Validated foundational knowledge of AWS cloud concepts, core services, security, pricing, and cloud architecture. View Certificate | View Badge

Java Programming Certificate – HackerRank. Demonstrated knowledge of Java programming fundamentals and problem-solving. View Certificate

Foundations of Artificial Intelligence & Machine Learning – DataValley (2025): Gained foundational knowledge of Artificial Intelligence, Machine Learning concepts, and data-driven problem-solving techniques.

Coding Activities

- Practice Data Structures and Algorithms regularly on LeetCode to strengthen problem-solving and programming skills.
- Participate in coding contests and programming challenges on LeetCode and GeeksforGeeks.
- Explore AI-assisted development tools to improve coding workflow and productivity.
