Summary

Data Science graduate with strong knowledge of Java, Python, SQL, Data Structures & Algorithms, and full-stack web development. Skilled in building responsive web applications and solving coding challenges. Seeking an entry-level Software Engineer role to develop scalable, high-quality software solutions.

Education

Bachelor of Technology in Data Science
Rajeev Gandhi Memorial College of Engineering and Technology (RGMCET), Nandyal, Andhra Pradesh, India
2022 – 2026 — CGPA: 7.27 / 10.0

Skills

Programming Languages: Java, Python, JavaScript
Databases: MySQL, SQL, MongoDB
Developer Tools: Eclipse IDE, Git, GitHub, VS Code, MySQL Workbench, Postman
Core Concepts: Object-Oriented Programming (OOPs), JDBC, REST APIs

Projects

E-Commerce Fashion Store — Java, MySQL, HTML, CSS, JavaScript

- Developed a Java-based e-commerce web application that enables users to browse products, search by category, manage shopping carts, and place orders.
- Implemented user authentication, product management, and order-processing modules in Java, integrated with a MySQL backend.
- Designed and managed a MySQL database to efficiently store and retrieve product, user, cart, and order information.
- Built responsive user interfaces using HTML, CSS, and JavaScript, integrating frontend pages with backend modules to perform CRUD operations.
- Deployed the application on Apache Tomcat, delivering a fully functional end-to-end solution.

MediCore – Medical Dashboard Platform — JavaScript, HTML, CSS, SQLite, Java

- Developed a full-stack hospital appointment management system, implementing CRUD operations and relational database design principles.
- Designed relational SQL tables to efficiently manage patient, doctor, appointment, and review data.
- Worked with RESTful APIs for appointment booking, patient management, and healthcare data operations.
- Implemented user authentication and role-based access control for Admin and Patient modules.
- Applied database normalization, SQL queries, and backend logic to manage healthcare records efficiently.

Certifications

- **AWS Certified Cloud Practitioner** – Amazon Web Services (AWS) (2025): Validated foundational knowledge of AWS Cloud concepts, core services, security, pricing, and cloud architecture.
- **Foundations of Artificial Intelligence & Machine Learning** – DataValley (2025): Gained foundational knowledge of Artificial Intelligence, Machine Learning concepts, and data-driven problem-solving techniques.
- **Python (Basic) Certificate** – HackerRank (2025): Demonstrated proficiency in Python programming fundamentals, problem-solving, and basic programming concepts.

Coding Activities

- Consistently practice Data Structures and Algorithms on coding platforms such as LeetCode to strengthen problem-solving and programming skills.
- Maintain organized GitHub repositories for academic and personal projects, demonstrating version control best practices.
- Actively explore AI tools to improve software development and improve productivity.
